SUMMARY

Eva is a cooperative ride-sharing application based on blockchain.

# PROBLEM

There are not many alternatives to traditional ride-sharing companies that does not take over local transportation economy.

# PROBLEM

25% of local transportation economy being stormed by traditional ride-sharing companies.

London  
39-41% of market

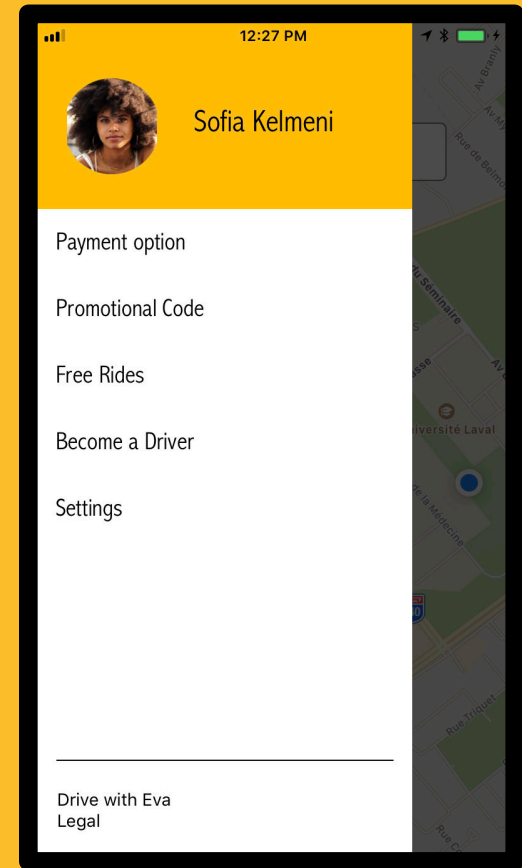

Paris  
27-30% of market

Warsaw  
14-17% of market

# SOLUTION

Eva is a cooperative ride-sharing application based on blockchain.

1

Local cooperatives for legal, security, and marketing matters

2

Decentralized application with immutable technology for global scalability

# SOLUTION

95% of local transportation economy stays at the local level.

Cooperative  
Democratic governance  
Operations management  
Grassroots marketing

Blockchain  
Anonymous open database  
Immutable structure  
Low management fees

Driver Member  
More revenue  
Flexible schedule  
Dividends

Rider Member  
Cheaper  
Higher user experience  
Dividends

# SOLUTION

Driver and riders members, and EVA (utility token) holders are at the center of the foundations of Eva, namely life, liberty, and localization!

# SOLUTION

Cooperative governance with dividends.

Decentralized safe technology with data anonymity.

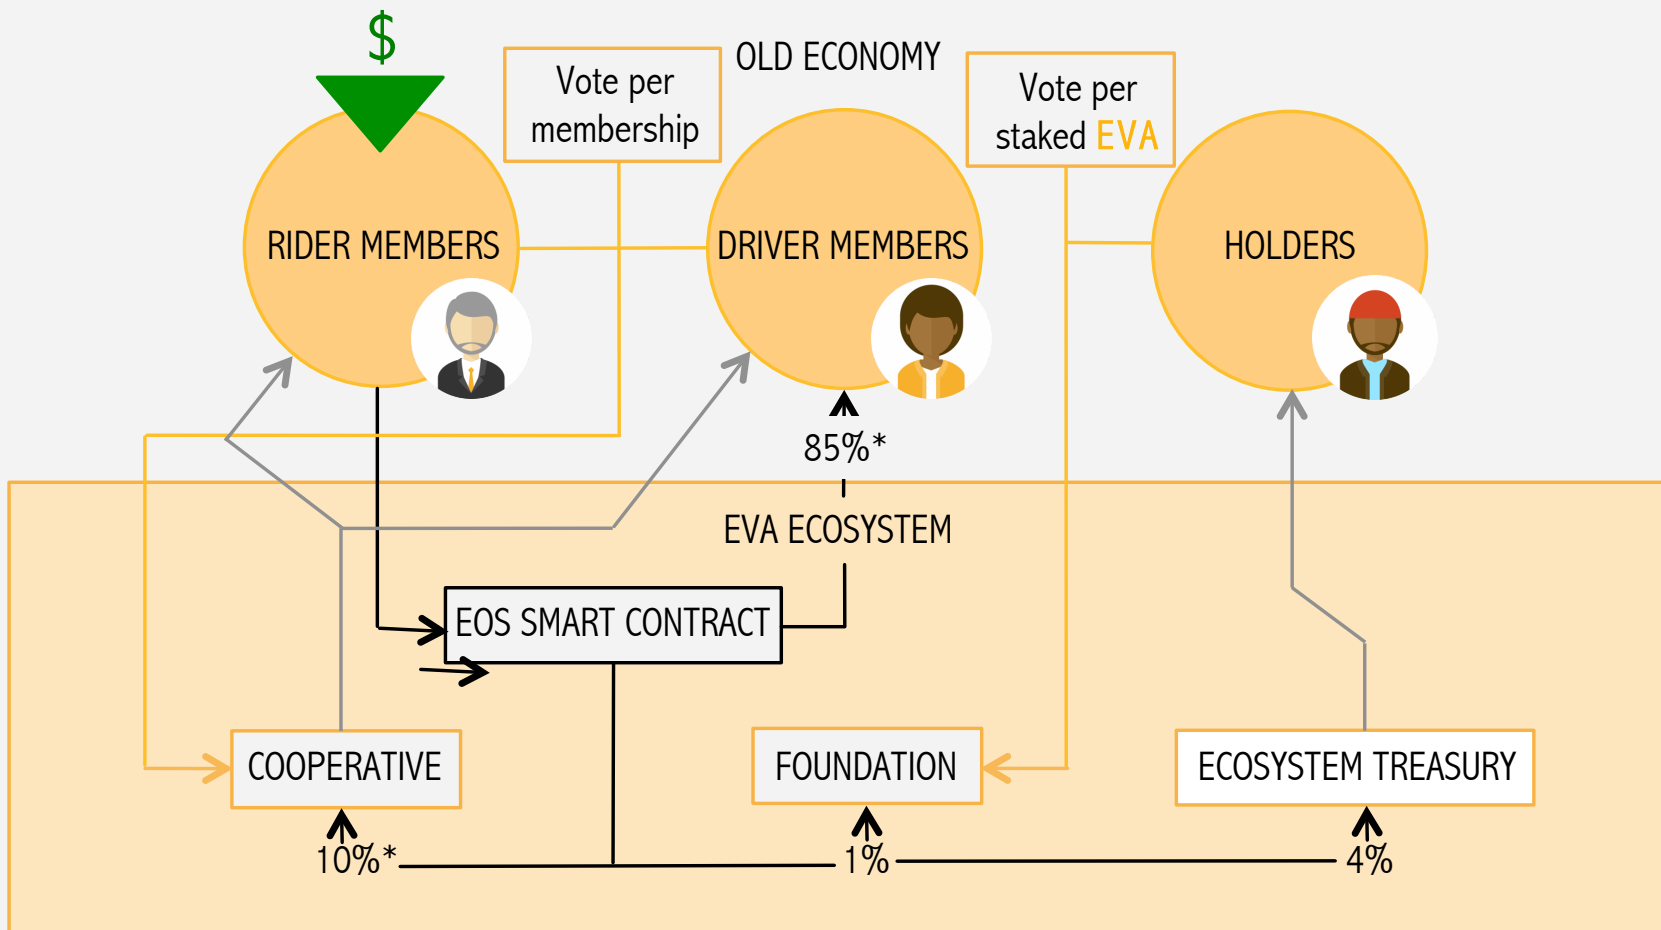

Give back the power of **data**, **economy**, and **mobility**.
