

CodeOp

Designing a diverse
tech industry

“Diverse teams, including ones with greater gender diversity, are on average more creative, innovative, and ultimately more profitable. This strong, positive correlation between higher levels of employee diversity and stronger financial performance has been demonstrated consistently across sectors and geographies...”

who we are

Barcelona's First Coding School for Women and the TGNC Community

CodeOp offers advanced technical training in full stack engineering. Our international students receive in-person instruction in small group classes, as well as ongoing individual mentorship and career guidance.

Our mission is to equip women and TGNC folks with the skills needed to become leading developers, and to launch a supportive network of professionals who will transform the culture of tech.

our training programs

Full Stack Engineering (Part & Full Time)

No technical background is required to enroll in this course. Students begin the program focused on programming fundamentals, advanced JavaScript, data structures, and algorithms. They learn to develop complete full stack applications using: React.js, Vue, Node.js, Express, MySQL, Git, and Heroku.
