

codebar

codebar is a non-profit initiative that aims to facilitate the growth of a **diverse** tech community by making technology and coding more **accessible**

Our goal is to enable underrepresented groups to learn programming in a **safe** and **collaborative** environment.

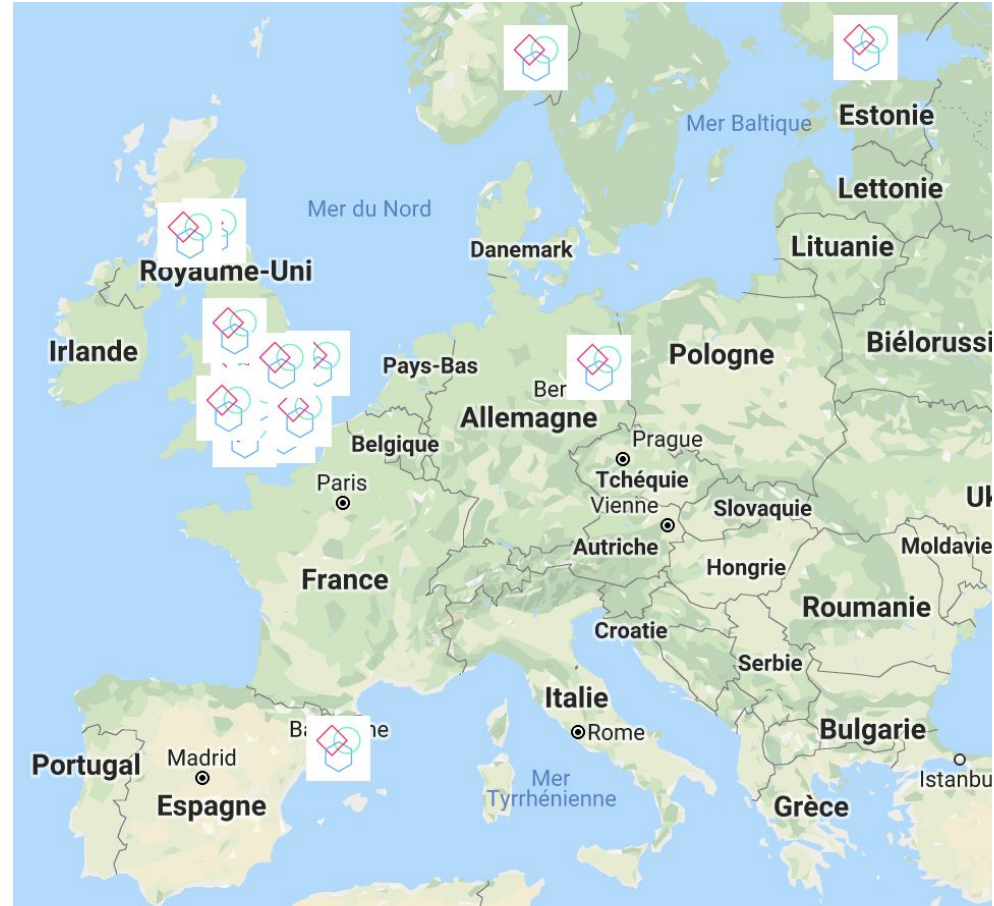

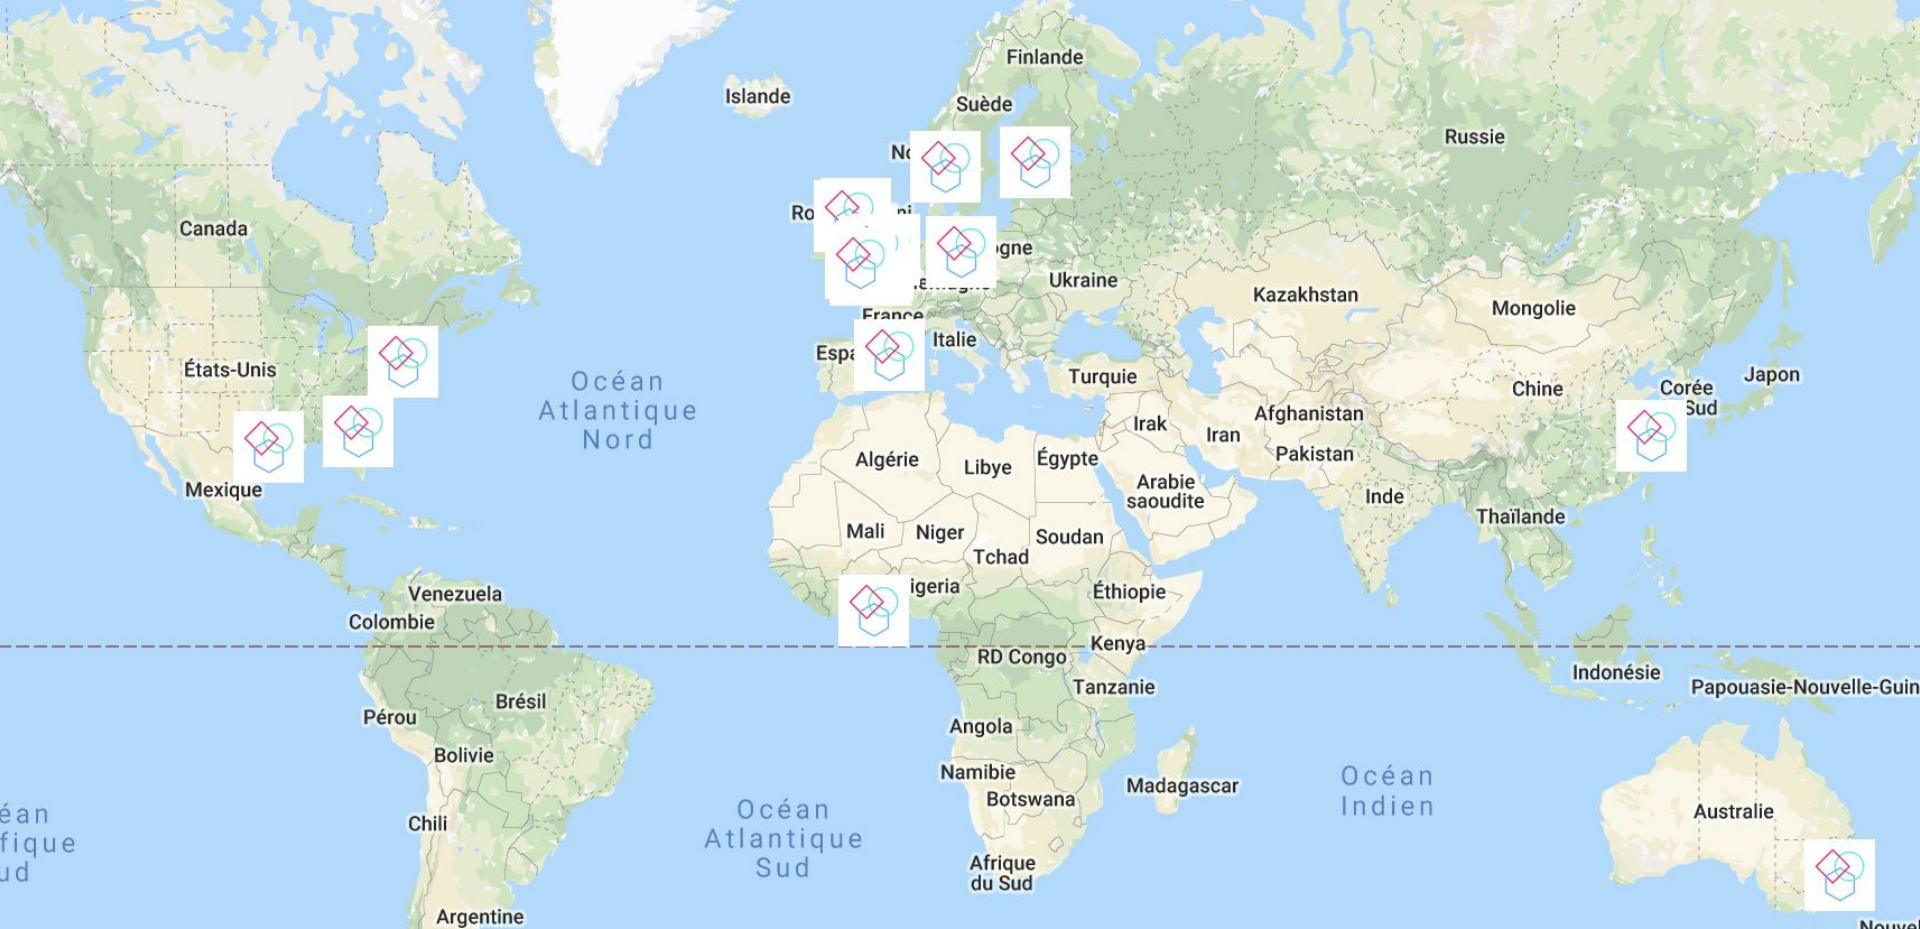

To achieve this we run
free workshops
every two weeks
and do our best to create
opportunities for our students

codebar started in
London - UK
in 2014 and has been
growing ever since...

With more than **15,000** total members across all our chapters

In Barcelona we meet at
different companies that
share our **goals**
