

Planetmakers Presents

PlaNET Platform

Building the infrastructure

for the collaborative, sustainable world we
are all working towards

The Technical breakthrough

 H O L O

- HOLO: building the new distributed internet
- Local servers, in your community, under your control. Ready to ship.
- On Blockchain-like technology
- No trolls, no fake accounts

The *PlaNET*

Infrastructure will provide

- A *Social Action Network*

- (*Think: your community-controlled FaceBook/Twitter/etc.*)

- Locally-controlled & incorporating trust

- A *social marketplace*

- (*Think: local Amazon/eBay but your community keeps the profits*)

- With reputation for caring for people and planet

Vision: Building Sustainable communities On top of PlaNET

And much more...

State of the project:

**EIC Horizon Prize on
BLOCKCHAINS FOR SOCIAL GOOD**

- We have applied for funding from the €1 Million EU Prize Blockchains for Social Good
- We have a great set of partners: including BARCELONA SHARING CITY!
- We have a usable working prototype

We are looking for communities to take part!

**IT WILL
BECOME THE
NEW
COMMON
SENSE!**

You can do it
now. The world
is ready! You
have many
starting points

Our technology
was too
primitive. Yours
isn't about
to be!

Work
an
An
other
to r
happen.

GO FOR IT!

Building the infrastructure

for the collaborative, sustainable world we
are all working towards

The vision

**B4RN NOT-FOR-PROFIT
COMMUNITY BROADBAND**

OPEN DAYS

**Saturday 7th September
Burston Church 10.30am to 4pm**

**Sunday 29th September
Gissing Community Building 2pm to 5pm**

Come along and see...
